

**Study Reference Sheet for:  
Swimming Pools**

The examination for 7-60 Swimming Pools is a 50 multiple-choice question examination covering all aspects of construction of all different types of swimming pools. While the following references may not contain all information needed to pass this examination or to practice this trade successfully, the references should be extremely beneficial for preparing for the examination. We have listed download sites on the internet where possible. However, website addresses sometimes change and the publications may have to be obtained directly from the authors or publishers.

**Equipment Utilization**; Subcourse EN5478, Edition A; U. S. Army Engineer School; Fort Leonard Wood, MO; 1994. This publication can be found at:
